

Identifying Angles in Art

On the opposite side of this page is a stained glass artwork of a fox. It uses quadrilaterals and triangles, with a variety of angles.

Try to identify the following types of angles in the art:

- Obtuse angle (OA)
- Acute angle (AcA)
- Right angle (RA)
- Adjacent angles (AdjA)
- Vertically opposite angles (VOA)
- Angles in a right angle (AIRA)
- Angles on a line (AOL)
- Angles at a point (AAP)
- Complementary angles (CA)
- Supplementary angles (SA)

Write the initials of the type of angle and draw an arrow to where you can spot it in the artwork.
